Any guesses why people call it an *'OS'*

- Both **emacs & vim** are very powerful editors.
- Invest some time to learn them, you will not regret it.
- In appropriate hands both can shred text at speed of thought.
- Don't get involved in flame wars, exploit the best of both the worlds.

- Both **emacs & vim** are very powerful editors.
- Invest some time to learn them, you will not regret it.
- In appropriate hands both can shred text at speed of thought.
- Don't get involved in flame wars, exploit the best of both the worlds.

- I barely illustrated a mere 1% of the power of these beasts.

Take Aways

- Both **emacs & vim** are very powerful editors.
- Invest some time to learn them, you will not regret it.
- In appropriate hands both can shred text at speed of thought.
- Don't get involved in flame wars, exploit the best of both the worlds.

- I barely illustrated a mere 1% of the power of these beasts.
  - Manuals are your friends.
